(57) Abstract:

PURPOSE: To eliminate the need of separate issuance of a detailed purchase statement by providing a printing means which prints the detailed purchase statement which is used as a base for calculating a rebating point when a service ticket with the rebating point printed is issued.

CONSTITUTION: When a customer who wants to receive a service ticket inserts his member card into the card inserting port 9 of a store monitor 6, the monitor 6 calls the data file of a member number printed on the card from a customer data file and stores the called data file in the register of a RAM 19. Then the monitor 6 displays the member number, name, and service point on an operating and displaying section 8 together with an operation guide. When the customer touches key '1' for issuing service ticket with detailed purchase

ticket with detailed purchase statement according to the displayed operation guide, the monitor 6 issues the service ticket with detailed purchase statement. At the time of issuing the service ticket, a perforation for separation is provided at the boundary between the statement and service ticket sections.
